

# Upgrading from 4.1.19 to 4.2.2 Instructions

## Backup the GoPrint Server environment

1. Backup the following files and directories:
  - GS4\goprint.cfg
  - GS4\gtx.keystore
  - GS4\certs\
  - GS4\logs\
  - If you have imported your own Certificate Authorities include*
  - GS4\jre\lib\security\cacerts\
2. Backup your database  
(see your database vendors documentation for instructions)

## Update the GoPrint Java runtime environment

### (Do this for each PayStation and Agent then the Server)

1. Stop the GoPrint service
2. Rename the GS4\JRE folder to GS4\JRE\_old
3. Download the 64-bit or 32-bit Oracle Java 8 update 60 archive as needed
  - 64 bit server/paystations: <http://software.goprint.com/gs4/jre-8u60-server-x64.zip>
  - 32 bit server/paystations: <http://software.goprint.com/gs4/jre-8u60-server-i586.zip>
4. Extract the JRE folder from the downloaded archive and copy into the GS4\ folder
5. Start the GoPrint service
6. Upon successful start of the GoPrint service, delete the GS4\jre\_old folder

## Update the GoPrint Server environment to 4.2.2

1. Stop the GoPrint service
2. Download the GoPrint update into the GS4\updates\ folder  
<http://software.goprint.com/webcheck/updates/gs4-updf-4.2.2.zip> **DO NOT UNZIP**
3. Start the GoPrint service

**Note:** Remote PayStations and Agents will be automatically updated by the server to 4.2.2

## Upgrade Web Client Pop-ups

1. Obtain the latest web client popup at: GS4\Lib\downloads
